

**INTRODUCING
OUR NEW SERVICE**

COVID-19/Coronavirus Sanitising Solution

**The safe solution
for you at home
and at work**

Our sanitising and disinfecting service eliminates Coronavirus and in particular COVID-19

Due to an increased demand My Secret Fairy now provides a sanitising fog treatment to eliminate the COVID-19 virus.

Approved COVID-19 Sanitising. Our preventative sanitisation service utilises a sanitiser and disinfectant, ideal for providing a COVID-19 free home/work environment.

Kills envelope viruses in 5 minutes.

The treated areas can be used after 1 hour of treatment.

Antiviral Sanitising Service

Kills the COVID-19 virus

We can now offer you a sanitising and disinfecting service that eliminates all envelope viruses, including COVID-19 and up to 99.99% of bacteria.

Our full disinfection fogging method utilises robust germicides, leaving all surfaces free from bacteria and virus.

By using specialist mist fogging machines, we are able to cover large areas without missing hard to reach areas.

The sanitiser lands dry on all surfaces hard or soft, without causing any harm and offers a full coverage of disinfectant.

HOW IT WORKS

Our mist fogging method uses air speed to atomise the disinfectant and DOES NOT deteriorate the disinfectant to create the fog.

This technique involves a very fine disinfectant being sprayed/misted across an entire area/workplace, coating the surface and soft furnishings.

The disinfectant kills on contact and we would suggest letting the disinfectant dry before re-entry.

It is generally up to an hour before it is completely safe for you to return to your home/work.

Full fogging
treatment with
particular
attention to
'High Touch
Areas'

Bespoke
Sanitisation
approach
with specially
trained
technicians

HIGH TOUCH AREAS INCLUDE:

Door handles
